

Pesticides for Specialty Vegetable Crops

Instructions for Label and SDS Information

1. If you or your employees are handling pesticides, **you are required to have a complete copy of the label near you in the field.** It can be a printed copy, or you can download it from AGRIAN to your phone.
2. For the pesticide product you are applying, **use the cover sheets** to find the basic safety information and application requirements from the label.
3. Check your pesticide product to **make sure the label information matches.** Pay attention to the brand name, active ingredient, concentration, formulation, and EPA registration number. Even if the active ingredient is the same, you must use the specific label for the brand, concentration, formulation, and EPA registration number of the product you are applying.
4. The rates given on the cover sheets show the range of application rates for different pests on each crop. **Check the label to see the exact rate** for each pest.
5. The information on the cover sheet for each pesticide is a summary of basic information from the pesticide label. **Check the complete label** for the specific requirements for each crop and pest including first aid, maximum application rate for each season or year, and other important information.

This information was updated March 2018. Always check the most up-to-date pesticide registration and label information before applying pesticides.

Daim ntawv qhia ntawm no tau sau tawm thaum lub 3 hlis ntuj 2018. Nco ntsoov txhua lub sijhawm thaum yuav siv cov tshuaj tua kab, saib daim qauv tshuaj uas yog daim registration, saib cov tshuaj no pus siv tau rau cov qoob loo lawm, thiab nyeem daim qauv tshuaj uas yog daim label ua ntej koj yuav siv cov tshuaj tua kab.
